SOURCES OF PERSONAL INCOME

Personal income rose $11.2 billion (annual rate) in September, following a rise of $7.4 billion in August. The changes were affected by two special factors: a large increase in subsidy payments to farmers in August and a large increase in retroactive social security payments in July. Excluding the effect of these factors, personal income increased $6.1 billion in September and $9.7 billion in August.

[1] Data are prorated averages of Wednesday figures for domestically chartered banks and averages of month-end data for foreign-related institutions. Data beginning January 1984 are not strictly comparable with data for earlier periods, largely because beginning January 1984 certain obligations of States and political subdivisions are included in loans rather than in other securities.

[2] Excludes loans to commercial banks in the United States.

[3] Data are averages of daily figures.
